THE PROFESSIONAL DESKTOP PRINTER FOR MONO IN A4

ECOSYS®

For many businesses, the need for a fast, reliable and productive desktop laser printer is important for creating every day business documents. This compact, yet fast desktop monochrome laser printer provides users with up to 35 pages per minute, paper saving two-sided Duplex printing and connects easily to any PC with a standard USB interface. With its strong productivity and low total cost of ownership thanks to Kyocera's ECOSYS® long-life technology, the ECOSYS P2135 is the desktop printer you can count on.

> Up to 35 pages per minute in A4
> Fine 1,200 dpi printing quality
> Standard duplex functionality for double-sided printing
> Standard USB Connectivity
> 250-sheet universal paper cassette
> 50-sheet multi-purpose tray
> Easy to read LED Operation Panel
> Exceptionally low printing costs in its class

ECOSYS stands for ECOlogy, ECOnomy and SYStem-printing. With long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means that only the toner has to be replaced regularly, and the drum units every 300,000 pages. The modular design concept allows you to add workflow-enhancing functions as required. Integrated system software provides long-term cross-network compatibility. Kyocera's long-life components cost you and the environment less.

PRESCRIBE IIc

With the Kyocera page design and control language PRESCRIBE IIc, even complex graphics, logos and forms (multipart forms) can be created independently on the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

The KYOCERA NetViewer

The KYOCERA NetViewer enables complete monitoring and control of all ECOSYS printers and digital Kyocera multifunction units from any Windows© PC and thus provides ideal network administration. It also supports the standardised SNMP protocol.

Status Monitor and Command Centre

The Status Monitor shows the current printers condition and gives direct access to the Command Centre for the modification of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode or blocking of the control panel).

USB Host Interface for USB Flash Memory

PDF files can be printed directly from a USB Flash Memory (e.g. USB stick) via the USB host interface. Documents are selected directly via the printer's control panel. No computer is required.
